

PREMIUM WAX RIBBONS FOR FLAT HEAD PRINTERS

Economic 200 gives outstanding performance on a wide variety of labelling applications. Offering greater performance than other general purpose wax ribbons on the market, this product offers a sharper, blacker, and more durable print, even at print speeds as high as 12 IPS (300mm/s). Economic 200 is optimised for a wide range of energy settings, making it easy to change over from other wax ribbons adjusting the printer's heat settings. With state-of-the-art backcoating extends printhead life to over 2 million linear inches, and prevention of build-up, assures labels and images are clear, consistent and highly readable.

Recommended Media

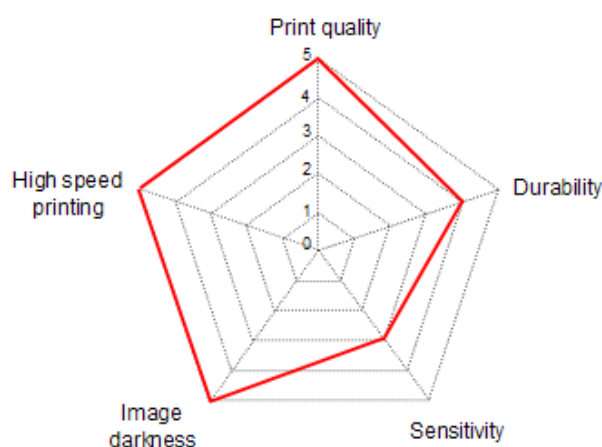

Coated/uncoated paper tag and label stocks
Synthetic paper
Packaging printing
Polyethylene films (i.e. Polyart®)
Polypropylene films (i.e. Kimdura®)

Technical Specifications

| | |
|------------------------------|--------------------|
| Ink | Premium Wax |
| Color | Black |
| Film Thickness..... | 4,5 microns |
| Total Thickness | 8,3 microns |
| Transmissive Density | 2,70 MacBeth Scale |
| Ink Melting Point | 65°C (149°F) |
| Recommended Max. Print speed | 12 IPS |
